---

Preface	ix
---------	----

---

Acknowledgments	xi
-----------------	----

---

1. Introduction to Well Planning	1
Well Planning Objective, Classification of Well Types, Formation Pressures, Planning Costs, Overview of the Planning Process	

---

2. Data Collection	9
Offset Well Selection, Data Sources, Bit Records, IADC Reports, Scout Tickets, Mud Logging Records, Log Headers, Production History, Seismic Studies	

---

3. Predicting Formation Pressures	39
Pressure Prediction Methods, Origin of Abnormal Pressures, Seismic Analysis, Log Analysis	

---

4. Fracture Gradient Determination	97
Theoretical Determination, Field Determination of Fracture Gradients	

<b>5. Casing Setting Depth Selection</b>	<b>116</b>
Types of Casing and Tubing, Setting Depth Design Procedures	
<b>6. Hole Geometry Selection</b>	<b>139</b>
General Design Procedures, Size Selection Problems, Casing and Bit Size Selection, Standard Bit-Casing Combinations	
<b>7. Bit Planning</b>	<b>152</b>
Drill Bits, Drag Bits, Rolling Cutter Bits, Diamond (and Diamond Blank) Bits, Rolling Cutter Bit Design, Watercourses, Bearing Lubrication System, Bit Sizes, Bit Body Grading, Bit Classification, Bit Cones, Diamond Bits, Polycrystalline Diamond Bits, Drilling Optimization, Matching the Area Average, Bit Selection, Formation Hardness and Abrasiveness Mud Types, Directional Considerations, Rotating Systems, Coring, Bit Size	
<b>8. Drilling Fluids Selection</b>	<b>227</b>
Purposes of Drilling Fluids, Types of Drilling Fluids, Introduction to Drilling Fluids Chemistry, Field Testing Procedures, General Types of Additives, Specialty Mud Additives	
<b>9. Cementing</b>	<b>278</b>
Purposes of Oil Well Cementing, Cement Characteristics, Cement Additives, Slurry Design, Cementing Equipment, Displacement Process, Special Cementing Problems	
<b>10. Directional Planning</b>	<b>331</b>
Purposes of Directional Drilling, Design Considerations, Calculation Methods, Directional Drilling Techniques

<b>11. Casing and Tubing Concepts</b>	<b>357</b>
Pipe Body Manufacturing, Casing Physical Properties, Pipe Connectors	
<b>12. Casing Design</b>	<b>386</b>
Maximum Load Concept, General Casing Design Criteria, Surface Casing, Intermediate Casing, Intermediate Casing When Used with a Drilling Liner and the Liner, Production Casing, Special Casing Design Criteria	
<b>13. Tubing Design</b>	<b>430</b>
Tubing Design Criteria, Packer and Seal Arrangements, Producing Conditions Affecting Tubing Design; Burst, Collapse, and Tension Evaluation	
<b>14. Completion Effects on Well Planning and Drilling</b>	<b>452</b>
Reservoir and Production Parameters, Surface and Subsurface Completion Equipment, Types of Completions, Packer Fluids, Completion Factors Affecting the Well Plan and Drilling	
<b>15. Drillstring Design</b>	<b>488</b>
Purposes and Components, Drillpipe, Drillpipe Tool Joints, Drill Collars, Stabilization, Drillstring Design, Drill-Collar Selection, Drillpipe Selection, Lateral Tool Joint Loading	
<b>16. Rig Sizing and Selection</b>	<b>534</b>
Rig Types, Power Systems, Circulating System, Hoisting System, Derricks and Substructures, Mud Handling Equipment, Rig Floor Equipment, Blowout Preventers, Rig Site Preparation, Special MODU Drilling Considerations	

---

**17. Special Drilling Logs 653**

Temperature Log, Radioactive Tracers, Noise Logging, Stuck Pipe Logs, Cement Bond Logs, Casing Inspection Logs, Mud Logging, MWD, Electromagnetic Orienting Tool, Ultra-Long-Spaced-Electric Log (ULSEL), Magrane II

---

**18. Hydraulics 678**

Purposes, Hydrostatic Pressure, Buoyancy, Flow Regimes, Flow (Mathematical) Models, Friction Pressure Determination, Jet Optimization and Planning, Surge Pressures, Cuttings Slip Velocity

---

**19. Well Cost Estimation: AFE Preparation 740**

Projected Drilling Time, Time Categories, Time Consideration, Cost Categories, Tangible and Intangible Costs, Location Preparation, Drilling Rig and Tools, Drilling Fluids, Rental Equipment, Cementing, Support Services, Transportation, Supervision and Administration, Tubulars, Wellhead Equipment, Completion Equipment

---

**APPENDICES 774**

A—Case study (homework problem)	774
B—Brine fluid tables	782
C—AFE work sheets	800
D—Drilling equations	821
E—Drillpipe tables	828
F—Casing and tubing tables	847

---

**INDEX 955**
